Test Laboratory Technician

Job Description
TCA is seeking a Test Lab Technician who will perform intermediate level laboratory assignments including maintenance and calibration of equipment and laboratory testing. Perform simultaneous testing procedures in accordance with written procedures, manuals and other instructions. Utilize a variety of laboratory equipment and tools. Participate in team meetings and problem solving sessions as required. Provide laboratory duties of a more difficult and/or complex nature. This is the intermediate level of this job family.

Job Duties
Set up equipment and laboratory procedures; check and refill fluids, heat ovens, etc.
Obtain materials/supplies required for work tasks.
Calibrate and perform preventative maintenance on equipment, including documentation.
Perform sample/test preparations including locating, labeling and verifying test materials, dissolution and filtering, and instrument set-ups.
Perform laboratory tests, following established documented procedures and schedules using established safe methods and processes.
Enter data into computer program; review output ensuring accuracy; verify and document test results, noting abnormal data and send information to supervisor for review.
Update test log ensuring accuracy and proper tracking of samples.

Qualifications
The ideal candidate will have a High school degree or GED level education, plus a minimum of one year experience in a laboratory or similar environment; a minimum of two years experience working in a carbon composite manufacturing environment; or an Associate of Arts Degree in a lab science or closely related field, or equivalent.
